Water on Wheels: Mobile Clarification

On Tuesday, April 17, you are invited to join Veolia Water Technologies to learn how mobile clarification technologies can

Click here to register.

support your plant's water treatment needs.

Whether you are planning to bypass your existing clarifier for maintenance, need more capacity, or your influent or effluent quality needs have changed, Veolia can help.

Tuesday - April 17
2:00 to 2:45 PM (EDT)
Cost: Free

About this Webinar

Mobile water treatment can play a key role in a plant's overall water management strategy. Today, portable solutions are able to cover emergency, temporary or long-term water treatment needs. Mobile units can be deployed via stand-alone units or in combination to form complete systems with state-of-the-art purification technologies.

The flexibility and cost-saving potential of temporary mobile water treatment solutions has encouraged growth within the industry.

This webinar will present case studies showcasing how Veolia's mobile Actiflo technology has helped plant's maximize up-time and reduce costs through a variety of applications including clarification, softening, metals removal of surface water, well water, wastewater, and combined sewer overflow.
